Nickolas Berra

Software Engineer — Full-Stack (React / TypeScript / Node.js)

Saint Peters, MO • 636-577-1590 • nberra90@gmail.com • linkedin.com/in/nickberra • nberra.dev • github.com/bnerra

PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years of experience designing, building, and supporting production web applications for enterprise clients using React, TypeScript, Node.js, PostgreSQL, and AWS. Owns features end-to-end, from technical design through deployment and production support, and works closely with product, design, and business stakeholders. Builds independent real-time data projects using AI coding assistants in a review-driven workflow.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React (18/19), Next.js, Redux, Vue.js, Node.js, Express, Fastify, Java
Data, APIs & Tools: PostgreSQL, SQL, Elasticsearch, REST APIs, Server-Sent Events (SSE), Git, Postman, Postico
Cloud & DevOps: AWS (Lambda, EC2, S3, ECS/Fargate, RDS, CodeBuild, CloudWatch), Docker, GitHub Actions, Vercel
Testing, UI & Visualization: Jest, Mocha, Material UI, SCSS, Styled Components, Vega, D3.js, SlateJS, Chrome DevTools

PROFESSIONAL EXPERIENCE

Software Engineering Consultant — Client: Bayer

CGI Inc. (formerly Daugherty Business Solutions) • St. Louis, MO • Feb 2019 – Feb 2026

- Built and shipped full-stack features across three production apps (React, TypeScript, Node.js, PostgreSQL, AWS).
- Designed and built a dynamic report-templating system on top of datasets from an upstream data platform.
- Implemented role-based permissions from enterprise SSO user groups (view/edit access, admin features).
- Implemented interactive data visualizations (Vega, D3.js) to support data-driven decision making.
- Built and integrated REST APIs for data flow across internal systems and external APIs.
- Built a serverless PDF-generation flow: API-triggered AWS Lambda rendering HTML to PDF in S3, served via signed URL.
- Shipped via CI/CD: GitHub Actions checks (tests, linting) gated merges; CodeBuild auto-deployed.
- Managed secrets across dev, non-prod, and prod in Azure Key Vault and AWS Parameter Store.
- Wrote automated tests (Jest, Mocha) and validated changes against realistic, production-like data.
- Supported production applications through troubleshooting, defect triage, production rollbacks, and reliability fixes.
- Participated in Agile teams on sprint planning, technical design, and client-focused delivery; reviewed pull requests.
- Mentored a newer engineer as the senior developer on a two-person team.

Software Engineering Consultant — Client: Monsanto

Daugherty Business Solutions • St. Louis, MO • Mar 2018 – Nov 2018

- Designed Elasticsearch solutions on AWS and Node.js to improve search relevance across large datasets.
- Developed full-stack features with Vue.js, Java, and Node.js, enhancing UI and backend integrations.
- Supported PDF and HTML migrations into Adobe Experience Manager (data transformation, metadata extraction) and built automation tools for PDF generation, web crawling, and indexing.

PERSONAL PROJECTS

Info Ticker — Real-Time Sports & Data Dashboard

Fastify / Node.js / TypeScript (API) • React 19 / TypeScript / Vite (UI) • github.com/bnerra

- Designed and built a full-stack real-time data platform: a Fastify/TypeScript API that polls external MLB and weather APIs, normalizes results into a unified game state, and broadcasts live updates to clients over Server-Sent Events.
- Built a React 19/TypeScript front end purpose-built for fixed-resolution kiosk and TV displays, consuming the SSE stream via the EventSource API to drive live game tracking, division standings, player stats, and weather modules.
- Architected the backend around modular services (game-state service, SSE connection manager).
- AI-assisted build (Claude): design and component generation, hand-integrated, customized, and tested.

Atlas — Personal Site

- Built and deployed nberra.dev with Next.js and TypeScript on Vercel, using the same AI-assisted workflow.

EDUCATION

Bachelor of Science, Secondary Education (Mathematics) — University of Missouri, Columbia
